Dana Nikolaeva Chambourova

EXPERIENCE

Flexport | San Francisco, CA — *Software Engineer II*

MAY 2017 - PRESENT

Used *Ruby on Rails & React.js* to build Flexport's platform for the ocean service and procurement teams.

Led the initiative to introduce a standardized integration layer to communicate with suppliers and customers. This is an essential piece to be able to automate the ocean freight industry. My team of 4 joined me in implementing the system I designed.

Established and grew the Empowering Women, Femme & Non-binary aligned folks @ Flexport group. Aligned Flexport's unofficial groups to create a D&I task force that helped kick-start the conversation in the workforce and the hiring of a D&I&B consulting company.

Pinterest | San Francisco, CA — *Software Engineering Intern*

MAY 2016 - AUGUST 2016

Wrote *data mining parsers* to improve country and language detection for "pins" and improve content localization for international users.

Microsoft | Redmond, WA — *Software Engineering Intern*

MAY 2013 - AUGUST 2013

Design and implemented end-to-end (*C#, Javascript & Typescript*) the onboarding experience for the Operational Management Suite (OMS) platform.

Refactored the OMS configuration layer to allow user and company level configurations.

Team Interval | Chicago, IL — *Software Engineering Intern*

MAY 2013 - AUGUST 2013

Contributed to the student health tracking *Ruby on Rails* app & its testing framework.

Redesigned and built the new company's marketing page and all it's media content.
